## DETAILED ACTION

### Reasons for Allowance

Claims 1, 6-7, 13, 17, 29, 34-39, 42-51 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention is directed to a camera configured to generate media data signals.

The following is a statement of reasons for the indication of allowable subject matter:

The independent claims 1, 13, 17, 35, 38 are identifies the uniquely distinct feature for "a movie object pointing to the playlist list file, the movie object including a resume flag indicating whether resumption of reproduction of the video data at a suspended position is permitted or prohibited the resume flag indicating that, when a resume command for a second title of the plurality of titles is executed, the resumption of the second title is prohibited and a First title of the plurality of titles is reproduced instead".

**Kozuka et al., US 2007/0140653** discloses a recording medium capable of executing menu calls based on the particular characteristics of different versions of the same movie work when these different versions are recorded on a single recording medium. An AV clip and a dynamic scenario are recorded on a BD-ROM 100 (recording medium). The dynamic scenario is a command string showing a playback control procedure relating to video data, and has attribute information attached thereto. Attribute information is information showing a control procedure for when a user requests a menu call during AV clip playback, and includes a resume\_intension\_flag. The resume\_intension\_flag shows whether playback resumption of video data after the

Art Unit: 2621

menu call ends is intended.

**Saeki et al., US 6,067,400** discloses a multimedia optical disc comprising a data area for storing at least one object that has sub-picture data and moving picture data, wherein the data area includes a plurality of small areas, each of which includes a first sub-area and a second sub-area, with the object in the data area being stored over consecutive small areas; the first sub-area stores the moving picture data having a certain time period and the sub-picture data being reproduced at the same timing as the moving picture data, the sub-picture data being a menu image which includes a plurality of buttons for showing menu items for display; and the second sub-area stores control information including button control data for responding to a user's operation applied onto a menu image reproduced in the first sub-area in the same small area and auxiliary control data for substituting the user's operation applied onto the menu.

None of the prior art, either singularly or in combination, fails to anticipate or render the above underlined limitations obvious. Claims 6-7, 29, 34, 36-37, 39, 42-51 are dependent on claims 1, 13, 17, 35, and 38 and therefore dependent claims also allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
